EXECUTIVE SUMMARY Moorhead Transfer Station MND980609747

Situation

The Moorhead Transfer Station was established in 1973 to serve the Moorhead - Dillworth area. It is used as an intermediate stop for mixed, solid municipal wastes; wastes are deposited, recompact, and sent to the Moorhead landfill. No hazardous wastes have been reported as being disposed of at the site.

The 103C CERCLA Notification of Hazardous Waste Site designated the site location as the Moorhead Transfer Station. However, contact with the notifier revealed that the information on the Notification pertained to the old Moorhead dump site. Based on that information, the Minnesota Pollution Control Agency submitted the "Old Moorhead Dump" site to the U.S. Environmental Protection Agency for inclusion on the Environmental and Remedial Response Information System (ERRIS) list.

Inspection Priority Recommendation

No information was located which indicated any hazardous wastes except household wastes had been disposed of or received at the transfer station. Thus, no potential hazard is recorded in Part V of the Preliminary Assessment. This assessment pertains to the transfer station itself. No information about the site was gathered with regard to use prior to the transfer station. Since there is no record of hazardous waste disposal at the site, no further action is recorded in Part V.01. of the Preliminary Assessment.

IV. COMMENTS

The Moorhead Transfer station is a relatively (1973) new Solid Waste Facility that is periodically inspected by the MPCA. No hazardous wastes have been reportedly deposited at the site, MPCA. The "Old City Dump" located ca 2 miles NW is the site probably "disclosed" to the EPA as having been a repository of various Haz. Wastes.

V. SOURCES OF INFORMATION (Cite specific references e.g., state files, sample analysis reports)

No files available on the site prior to the establishment of the Transfer station.
